A healthier design foundation.

A soft-modern system for confident care. Shared values, clear hierarchy, and a practical handoff for HealthMate.

HEALTHMATE / DESIGN LANGUAGE

Clarity for every health journey.

Mobile first. Human always. Designed to make everyday health feel manageable.

Reassuring by design

Calm surfaces, plain language, and purposeful feedback.

Clear at a glance

Readable data, persistent units, and visible status labels.

Built to scale

Shared anatomy across devices, states, and care patterns.

Semantic color

Use semantic roles, not raw hex values, in product code. Status colors always include a text label or icon.

color.primary #2463D4
Actions · links · selection

color.secondary #087F83
Supporting care accents

color.background #F4F7FB
App canvas

color.text #152D4A
Headings · primary content

color.surface #FFFFFF
Cards · elevated regions

color.text.secondary #53677F
Descriptions · metadata

color.success #157347
Completed · healthy status

color.error #BD343D
Validation · critical feedback

Type with a human voice

Inter · sentence case · tabular numerals for clinical values

Heading / Display
48 / 58 px · 700

Care that feels connected.

Heading / H1
32 / 40 px · 700

Your health, at a glance

Heading / H2
24 / 32 px · 600

Today’s overview

Heading / H3
20 / 28 px · 600

Upcoming appointment

Subtitle
18 / 28 px · 500

Small steps. Better wellbeing.

Body / Regular
16 / 24 px · 400

Keep track of your daily health and care plan.

Label / Medium
14 / 20 px · 600

Book appointment

Space to breathe

4 px base · 8 px rhythm

space.4 — 4 px
space.8 — 8 px
space.12 — 12 px
space.16 — 16 px
space.24 — 24 px
space.32 — 32 px
space.48 — 48 px
space.56 — 56 px

Soft, not decorative

One radius per semantic role.

Small 8 px
Control 12 px
Card 16 px
Feature 24 px

Accessible by default

4.5:1
Normal text minimum

44 × 44
Minimum touch target

2 px
Visible focus stroke

Use 3:1 for large text and control boundaries. Never communicate clinical status by color alone.

From specimen to production

Native families use named variants, editable labels, and Auto Layout. Shared color variables, spacing tokens, and text styles are bound throughout the system.

Auto Layout: hug labels and content; fill flexible fields and cards. Use 1 px borders, 24 px card insets, and 16–24 px content gaps.

Static layouts · No automatic breakpoint behavior
