One care experience. Three contexts.

The following dashboard frames share the same patient, readings, visit, medications, progress, and care team.

Mobile / 390 px

Reference range: 320–599 px

4 columns · 16 px margin · 16 px gap

Bottom navigation · 76 px + safe area

One content column. Vitals become compact rows. Keep the next visit near the top.

Tablet / 834 px

Reference range: 600–1199 px

8 columns · 24 px margin · 20 px gap

Persistent 80 px navigation rail

Three vital cards. Full-width trend. Medications and progress sit beside visits and the care team.

Desktop / 1440 px

Reference range: 1200 px and wider

12 columns · 32 px margin · 24 px gap

Persistent 224 px labelled sidebar

Three vital cards. Wide trend and medication column, with appointments and care alongside.

Reflow, don’t remove

Maintain units, timestamps, medication status, and next actions at every size. Use content-driven card heights and preserve reading order.

Implementation guidance

These are static reference layouts, not automatic breakpoints. In code, test text scaling, keyboard focus, safe areas, and minimum 44 px touch targets.
